

Dosage and Administration

Preparing to administer mRESVIA¹

mRESVIA is a single, 0.5-mL dose pre-filled syringe containing a frozen suspension that must be thawed. At room temperature, mRESVIA is ready to use.

Refer to the images below for approximate thaw times.

Thawing 1 syringe (removed from carton) or a carton of 2 syringes

Thawing a carton of 10 syringes

Special precautions for thawing¹

- **Do not** shake mRESVIA
- **Do not** return syringes to the refrigerator after they have been thawed to room temperature
- Discard any syringes left at room temperature for over 24 hours

*Thaw in the refrigerator at 36 °F to 46 °F (2 °C to 8 °C).¹

[†]Thaw at 59 °F to 77 °F (15 °C to 25 °C), rather than at 46 °F to 77 °F (8 °C to 25 °C), as allowed for storage.¹

IMPORTANT SAFETY INFORMATION (CONT'D)

Warnings and Precautions (cont'd)

- **Syncope:** Syncope (fainting) may occur in association with administration of injectable vaccines, including mRESVIA. Procedures should be in place to avoid injury from fainting.
