

Your guide to understanding RSV and how to stay protected

What is RSV?

RSV stands for **respiratory syncytial (sin-SISH-uhl) virus**, a common and highly contagious virus that can affect your lungs and breathing passages. RSV often begins with mild cold- or flu-like symptoms, but for people aged 50 or older with certain existing health issues, infection can lead to more serious and potentially life-threatening illnesses.

Am I at risk for RSV?

Your immune system weakens with age and may have a harder time fighting off infections like RSV. If you're **aged 50 or older with certain medical conditions**, the risk of severe RSV infection and hospitalization can be high—making protection that much more important.

RSV can be especially risky for **adults with certain medical conditions**, such as:

Asthma

Diabetes

Chronic obstructive pulmonary disease (COPD)

Chronic cardiovascular disease or coronary artery disease

Chronic liver or kidney disease

Ask for mRESVIA

Protect yourself from RSV with mRESVIA by Moderna

mRESVIA by Moderna is a vaccine used to **protect adults aged 60 or older and adults 18 to 59 with at least one health condition that puts them at high risk** against lower respiratory tract disease caused by RSV.

Protect yourself against RSV. Ask your pharmacist or doctor about mRESVIA today.

What is mRESVIA (Respiratory Syncytial Virus Vaccine)?

mRESVIA is a vaccine to protect you against lower respiratory tract disease caused by Respiratory Syncytial Virus (RSV).

mRESVIA is for people 60 years of age and older and also for people 18 through 59 years of age who are at increased risk for RSV (people with medical conditions such as diabetes or with diseases affecting the lungs and heart). Vaccination with mRESVIA may not protect all people who receive the vaccine.

mRESVIA does not contain RSV. mRESVIA cannot give you lower respiratory tract disease caused by RSV.

IMPORTANT SAFETY INFORMATION

Who should not get mRESVIA?

You should not get mRESVIA if you had a severe allergic reaction to any ingredient in mRESVIA.

What should you tell your healthcare provider?

Tell your healthcare provider about all of your medical conditions, including if you:

- Have any allergies
- Had a severe allergic reaction after receiving a previous dose of any other vaccine

Please see Important Safety Information throughout or visit mresvia.com

What are the side effects?

The most common side effects associated with mRESVIA include:

- pain at the injection site
- tiredness
- headache
- muscle aches or joint pain
- underarm swelling or tenderness
- chills
- nausea or vomiting

Overall, mRESVIA was well tolerated, with side effects described as mostly mild or moderate.

In the clinical study, most of the side effects resolved within 1 to 2 days.

Safety results from the clinical trial of mRESVIA showed no serious side effects that could be linked to mRESVIA alone.

How much does mRESVIA cost?

The cost of vaccination with mRESVIA will depend on your insurance coverage, but for most people aged 50 years and older, mRESVIA is expected to be covered by insurance at \$0 out-of-pocket. **Ask your doctor or pharmacist if mRESVIA is covered.**

CDC Recommended

To protect against RSV, the CDC recommends vaccinating all adults who are:

- Aged 50 or older with increased risk of severe RSV
- Aged 75 years or older

*Coverage and cost may vary and are subject to change without notice. Reimbursement decisions are made by individual insurance plans.

†Per the Inflation Reduction Act.

IMPORTANT SAFETY INFORMATION (CONT'D)

What should you tell your healthcare provider? (cont'd)

- Have a fever
- Have a bleeding disorder or are on a blood thinner
- Are immunocompromised or are on a medicine that affects your immune system
- Have received any other RSV vaccine
- Have ever fainted in association with an injection

How is mRESVIA given?

mRESVIA is given as an injection into the muscle.

What are the risks of mRESVIA?

There is a very small chance that mRESVIA could cause a severe allergic reaction. A severe allergic reaction would usually occur within a few minutes to one hour after getting a dose of mRESVIA. For this reason, your healthcare provider may ask you to stay for a short time at the place where you received your vaccine. Signs of a severe allergic reaction may include:

- Trouble breathing
- Swelling of your face and throat
- A fast heartbeat
- A rash all over your body
- Dizziness and weakness

Side effects that have been reported in clinical trials with mRESVIA include:

- Injection-site reactions: pain, underarm swelling or tenderness in the same arm of the injection, swelling (hardness), and redness
- Fatigue, headache, muscle pain, joint pain, chills, nausea or vomiting, fever and hives

These may not be all of the possible side effects of mRESVIA. Ask your healthcare provider about any side effects that concern you. You may report side effects to the Vaccine Adverse Event Reporting System (VAERS) at 1-800-822-7967 or <https://vaers.hhs.gov>.
